REQUEST FOR QUOTATION

RFQ-GF-121026- Consultancy for Technical Assessment and Design of Solar Hybrid Power Systems

Plan International is an independent development and humanitarian organization that advances children's rights and equality for girls. We support children's rights from birth until they reach adulthood. We also enable children to prepare for and respond to crises and adversity. Using our reach, experience, and knowledge, we drive changes in practice and policy at local, national, and global levels. We have been building powerful partnerships for children for over 75 years and are active in more than 70 countries.

Plan International Liberia (PIL) serves as the Principal Recipient for TB/HIV components and C19RM under grants from The Global Fund (GC7). Through this role, PIL has played a critical part in strengthening Liberia's health infrastructure and systems. In close collaboration with the Ministry of Health Liberia and key stakeholders, PIL continues to advance efforts to build a resilient and integrated health system. This approach focuses on improving healthcare infrastructure, strengthening supply chain systems, and enhancing the country's capacity to deliver quality health services.

Plan International Liberia, in partnership with the Ministry of Health (MoH), intends to assess the existing power systems at 10 selected health facilities supporting GeneXpert services to determine whether repair, upgrading or a new solar installation is required. Reliable power is required to support GeneXpert platforms, associated laboratory equipment and essential facility operations.

Plan International Liberia therefore intends to engage a qualified consulting firm to undertake stakeholder consultations, detailed site assessments, energy audits, system sizing and engineering design. The consultant will prepare site-specific priced bills of quantities (BoQs) and the technical Terms of Reference/specifications required for a subsequent competitive process to select a solarization works vendor.

Interested firms may download the full RFQ package from the link below: [Request for Quotations \(RFQ\) for Services - TA and Design of Solar Hybrid Power.pdf](#)

Suppliers are expected to submit soft copy of their bids by or before **Friday, October 30, 2026, at 23:59 to liberia.procurementinfo@plan-international.org with RFQ-GF-121026- Consultancy for Technical Assessment and Design of Solar Hybrid Power Systems as subject**

Women-owned businesses and companies actively engaged in or advancing gender equality and women's empowerment in the workplace are especially encouraged to apply.
